EasyGlide™ Transport
Classic

Durable performance
for dependable caregiver-assisted transport

Yes, you can.

Introducing the new EasyGlide™ Transport Classic

Reliable Performance

A reinforced frame supports up to 250 lbs and is suited for routine transport use. Integrated wheel locks help secure the chair during transfers and stationary positioning.

Supportive Comfort

Seat and back padding provide cushioned support during transport, while padded armrests enhance comfort and stability. The seating surface is designed to support upright positioning for short-term mobility needs.

Foldable & Compact

The backrest folds down to reduce overall size when not in use. Measuring just 9 inches wide when folded and 29 inches high from floor to top of chair, its compact profile and manageable weight allow for easier lifting and vehicle placement.

A dependable, caregiver-assisted transport chair designed for safe mobility.

The EasyGlide™ Transport Classic comes fully assembled and is designed for caregiver-assisted mobility in everyday settings. Featuring fixed arms and a durable steel frame, it delivers dependable transport support across care environments.

Engineered for stability and straightforward handling, the Classic includes standard swing-away footrests and a folding backrest to simplify transfers and storage.
